

**Swedish material makers** - is a group of artists that since 2010 have worked with international exhibitions and exchanges at a professional level within the contemporary craft field. Our experience is that craft is reinforced through personal encounters where a direct dialogue can develop around the terms and conditions of the craft profession. We have completed exchange programs in Germany, Norway, Finland, Denmark and Iceland.

EVA ZETHRAEUS

**We are eight artists** based in various materials: ceramics, glass, textile and metal/jewellery. As a group, we also represent different generations and educational backgrounds. All participating artists are members of the Swedish National Crafts Organisation Konsthantverkscentrum. [www.konsthantverkscentrum.org](http://www.konsthantverkscentrum.org)

Throughout, craft is about the materials and their usability, their transformation and refinement. Our practice is based on craftsmanship and an artistic approach to narrative and investigative processes. For us craft represents a unique and complex skill and an independent force in society today.
